Large Antenna Mount EM-7

The EM-7 is designed to lag bolt to the underside of the eave. Mount a J-Pipe or any of our EM-Series mounts. This larger version of the EM-6 allows for installation of the 2" J-Pipe, commonly used for

DirecTV High Definition 5 LNB dish. Drilling holes into the roof is not necessary. The EM-7 makes for a rock solid surface getting around gutters, tile roofs or any other obstruction. The EM-7 Can also be used with the EM-SP, Swivel Plate for pitched eaves. EM-SP Sold Separately.

Specifications:

Face width 7x9"

Six Lag Bolt "T" Pattern

Heavy Gauge Steel

Powder Coated

Install:

Locate the cross members under the eave, connecting between the truss & the outer fascia. Lag bolt t 2x4"s using six lag bolts. Bolt the J-Pipe to the face of The EM-7. When using a 2" J-Pipe, Support Struts are recommended. Back tail of mount can be bent upwards & lagged into angled joist in open soffits.
